(54) Title: MECHANISM FOR OBTAINING AND PAYING FOR POSTAGE

(57) Abstract: A method (200) for obtaining a postage verification code includes the steps of transmitting a request (210) for a postage verification code from a communication device (120) to, and receiving the request (220) at, a Postal server (110). The Postal server (110) generates (230) and sends (240) a postage verification code to the communication device (120), in response to the request, such that a charge associated with said postage verification code is attributed to said communication device. The communication device (120) receives the postage verification code for subsequent applying to an item to be posted. In this manner, a user of say, a wireless communication device is provided with the ability to wirelessly request and receive postage verification codes at anytime, and from anywhere, so long as the user is able to connect to a wireless communication network, such as a GSM network, using a mobile phone, or similar wireless communication device. In particular, the user can be billed for the postage verification code via the user's wireless communication device account.
